ABOUT THE PROJECT

In this project, we aim to introduce financial literacy to preschool children. Through age-appropriate activities, games, and stories, children will take their first steps toward becoming financially aware individuals by learning about the value of money, saving, spending, sharing, and basic economic concepts. The project will include fun and engaging methods such as piggy banks, shopping simulations, story-based activities, and exploring different currencies from around the world. This way, children will develop financial awareness, a sense of responsibility, and the ability to plan ahead from an early age.

ACTIVITIES

Activity 1: Recognizing Money 💰

Activity 2: What Do Income and Expenses Mean? 💰

Activity 3: Let's Go Shopping! 🛒💰

Activity 4: Bank Visit 🏦💰

ABOUT THE PROJECT

Our project will last a total of three months, with two activities per month, resulting in six sessions in total. While children will get to know different currencies from around the world, they will also engage in unique and creative activities where they design their own money.

Throughout the project, we will maintain close communication with all partners, ensuring collaboration and consensus in every step.

Our ultimate goal is to raise individuals who understand income and expenses and learn the importance of saving. Additionally, children will become familiar with different currencies and reinforce their learning by sharing their knowledge with one another.
